

Explanation of Revisions

ECLIPTICA – ARR March 2026 Resubmission

Previous Submission

ARR January 2026, Submission #4229. Desk-rejected on Feb 13, 2026.

Desk Rejection Reasons

1. Paper exceeds maximum length (8 pages for long papers).
2. Single-column appendix (violation of double-column format requirement).

Revisions

Reason 1: Page Limit Exceeded

- Moved Discussion section from main body to **Appendix A**.
- Conclusion now ends on **page 8**. Limitations follows immediately after (does not count toward limit per ARR CFP).

Reason 2: Single-Column Appendix

- Removed all `\onecolumn / \twocolumn` commands.
- Wide content wrapped in `figure*[p]` (two-column compliant).
- All appendix pages now render in double-column format.

Additional Changes

- Switched to official `acl.sty` (from `acl2023.sty`).
- Corrected 7 bibliographic entries with incorrect arXiv IDs or fabricated authors.
- Added Acknowledgements section for AI writing disclosure (per ARR policy).
- Added ECLIPTICA dataset license (CC-BY-4.0) in Appendix D.
